

# Arxivar 365

*Efficient integration with Arxivar to archive Microsoft Dynamics 365 Business Central documents and manage Italian Electronic invoicing.*

**Would you like to have all your Microsoft Dynamics 365 Business Central documents easily archived in Arxivar?**

**Do you want to be able to configure the integration rules for each kind of documents, including custom ones, directly from Business Central?**

Direct integration with your own Arxivar NEXT via WS API to insert, modify and retrieve all your Business Central documents. With a straightforward assisted setup you will be able to define how and when to archive all your document classes and specify the metadata to store.

Arxivar 365 provides a two-way communication, completely managed by Microsoft Dynamics 365 Business Central, that gives users the possibility to take advantage of the power of Arxivar, without actually needing to know how Arxivar works.

The solution effectively manages all incoming and outgoing documents for Italian electronic invoice regulation.

With this App, you will have at your disposal:

- Easy to use, comprehensive assisted setup.
- Full Italian electronic invoice integration.
- Status check for all synchronized documents.
- Business Central and Arxivar users mapping for permissions management.

## Why Arxivar 365?

- Connect the best ERP and document management software via WS API.
- Manage any kind of Business Central document, including custom ones.
- Manage all incoming and outgoing documents for Italian electronic invoice regulation.
- Easy to use setup for Arxivar class mapping and document filtering.
- Business Central and Arxivar user mapping to easily manage permissions.
